

## Research, Development and Innovation Management policy R&D

FCC Industrial's leadership is expressed through innovation activities in line with the most significant breakthroughs in the sector, in terms of:

- **Technological and process innovation** linked to its activities.
- **Active participation** in those initiatives focused on the following lines of action:

- Process management.
- Energy infrastructures.
- Transport infrastructures.
- Industrial engineering Design and Development.
- MEPS (Mechanical electrical piping and systems).
- Occupational Health and Safety.
- Environment \_ Sustainability \_ Life cycle
- Energy efficiency.
- Technologies for industrial and energy use.
- Industrial control solutions.
- Computer systems development and maintenance.
- Cybersecurity.

- Research and innovation involves cooperation between the different departments, services and units.
- R&D activity dissemination.
- Commitment to satisfy application requirements.
- R&D management system continuous improvement commitment.
- This policy provides the reference framework for setting R&D&I objectives.
- FCC Industrial adheres to the FCC Group innovation management policies.
